

Homeowner, please sign

Radon Test Compliance Agreement

We have been asked to perform a Radon Test on this home for the prospective buyer.

The test will run from _____, and the equipment

pick-up time will be approximately _____ a.m. / p.m.

A Radon detection device has been placed in the _____ during this period.

For accurate test readings it is necessary for you to observe the closed house testing protocol.

These conditions are as follows:

- Keep ALL windows in the entire house closed.
- Exterior doors should be kept closed except for normal entrance and exit.
- Keep air conditioning/heating in the normal range 66-80 degrees F.
- Large volume air exhaust systems (whole house fans etc.) should not be operated.
- Do not move Radon Monitor. (The device is tamper sensitive)

You may operate heating and air conditioning normally. And, its all right to operate the clothes dryer, range hood, and bathroom fan under normal use during this period.

I have read and agree to comply with the Radon Measurement conditions listed above.

I have access code to the house. No one needs to be home at time of pick up.

Please call to make arrangements for pick-up of radon monitor. Thank You! Jeff 616-560-0359
